## SUMMARY

An aspiring and driven B.Tech student at Nirma University, passionate about developing innovative web solutions with a strong focus on MERN Stack and AI integration. Proven ability to conceptualize, develop, and deploy full-stack applications leveraging modern JavaScript frameworks and robust backend technologies. Eager to apply strong problem-solving skills and technical expertise to contribute to cutting-edge projects in web development and artificial intelligence.

## EDUCATION

**Bachelor of Technology (B.Tech) • Nirma University, Ahmedabad, India**

2027 • GPA 9.02

## SKILLS

**Technical:** React, Express.js, Node.js, MongoDB, JavaScript, HTML5, CSS3, RESTful APIs, Git, Natural Language Processing (NLP), Computer Vision (CV), Deep Learning (DL), Data Structures & Algorithms (DSA)

**Soft:** Problem Solving, Leadership, Teamwork, Communication

## PROJECTS

### VideoTube Project <https://github.com>

Developed and deployed a full-stack video sharing platform, 'VideoTube', utilizing the MERN stack (MongoDB, Express.js, React, Node.js). Engineered features for seamless video uploads, secure storage, and intuitive content consumption, enhancing user engagement and experience.

### AI Careers SaaS App <https://github.com>

Engineered a comprehensive MERN stack and Generative AI-powered SaaS application designed to revolutionize career preparation. Implemented functionalities for automated resume generation, real-time ATS scoring, personalized interview question preparation, and intelligent job matching based on user skills and resumes.

### X-Ray Master <https://github.com>

Created an AI-driven diagnostic tool, 'X-Ray Master', capable of classifying medical conditions from X-ray images using advanced Deep Learning and Computer Vision techniques. Developed a robust model to accurately identify diseases or confirm normal conditions, showcasing proficiency in machine learning deployment.
